EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	*Arithmetic; *Computer Uses in Education; *Context Clues; *Courseware; Mathematics Education; *Montessori Method; Primary Education; Visual Aids
IDENTIFIERS	Mathematics Activities

ABSTRACT

Montessori(TM) Learning Software programs are purportedly built upon the core concept of the Montessori philosophy, that a major path to intellectual development is through a child's hands and senses. Math by Colors, recommended for ages 4 to 8, encourages hands-on discovery by allowing the child to choose the right color from the assembled paint tins grouped at the bottom of each picture. Color is chosen by correctly identifying the answer to a mathematics problem (MKR)
